

HP AC Web Console Signing Tool

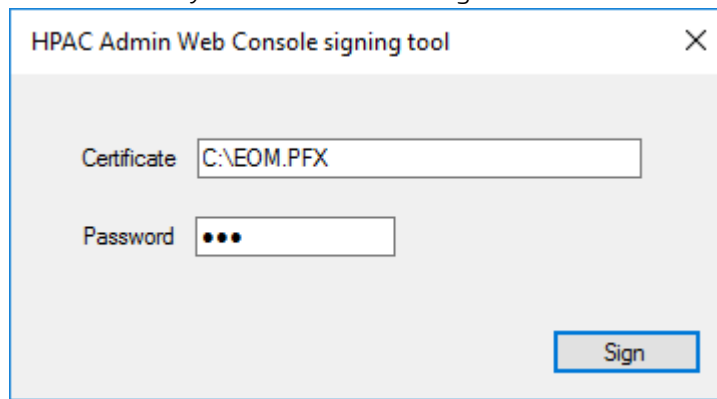

Summary

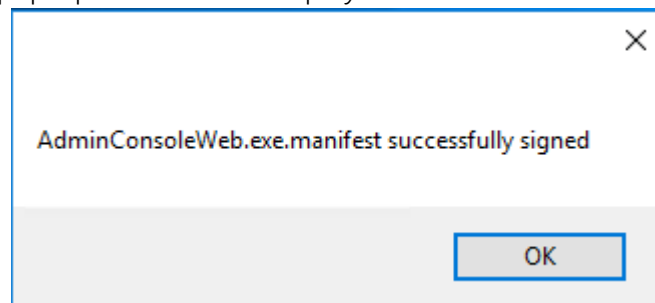

The HP AC Web Console Signing Tool allows customers to sign the web console XBAP files. Customers can use a code signing certificate (PFX file) of their choice to sign the files. After signing the Web Console files, when users open the HP AC Web Console, the customer name will display as the Publisher, instead of “Unknown Publisher”.

Web Console Signing Tool

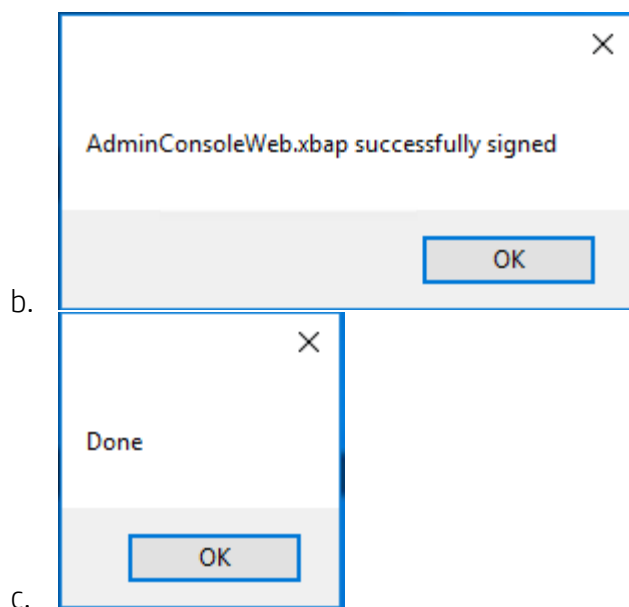

1. If using HP AC 16.3, the WebConsoleSigning.exe file is in the \HP Access Control\Utilities folder. If using an older version of HP AC, copy the WebConsoleSigning.exe file to the HP AC server.
2. Run the WebConsoleSigning.exe file as an administrator.
3. In the Certificate field, double-click to navigate to the location of the code signing certificate file you want to use to sign.

4. In the Password field, enter the password for the code signing certificate.
5. Click Sign.
6. Three pop-up windows will display:

a.

7. After signing is complete, open the HP AC web console from a web browser, and verify the Publisher is correct.
